HISTORICAL SKETCH

MERCY HOSPITAL AND ITS SCHOOL OF NURSING
EXTRA-CURRICULAR ACTIVITIES

Every student in our high school has an opportunity of enjoying extra-curricular activities. These activities are organized and supervised by experienced teachers who are experts in their particular fields.

The school believes in the development of the student's total personality. The emphasis is also given to the administration of the school, the student body, and the school staff.

The school provides various activities to encourage students to participate in extracurricular activities. These activities include sports, music, drama, and various clubs and societies. The school also organizes annual events to celebrate the achievements of the students.

EDUCATIONAL FACILITIES

The school has a well-equipped library, computer laboratory, and science laboratories. It also has a well-organized art and music department. The school provides a wide range of educational programs to meet the needs of all students.

The school has a well-equipped science laboratory where students can conduct experiments and learn about scientific principles. The library is well-stocked with books on various subjects, and the computer laboratory is equipped with the latest software.

NURSES' RESIDENCE AND SCHOOL OF NURSING

The nurses' residence is a separate building located on the campus of the school. It has all the necessary facilities for the comfort of the nurses and their families. The school of nursing provides a comprehensive nursing program to prepare students for a career in nursing.
each year between the months of May and September.

Vacations are arranged to conform to the demands of the school.

VACATION

Those students who are essential for a nurse,

nurses of the dormitory, office staff of the office, and library and laboratory

who are absent from practice and receive in theory, regular classes

and receive a high point of efficiency.

Students are given reasonable freedom in the control of their own

personal hygiene. The school provides facilities for a health program for its students.

HEALTH PROGRAM

and picnics.

**Social and Ethical Problems in Nursing**

Class and Discussion: 42 hours

In this course, the student is given some insight into the social and ethical problems arising in hospitals, homes, and public health agencies. The student is also given a better understanding of the roles and responsibilities of the patients, medical, and health professionals. This is an excellent course which aims to give the student a clearer idea of the role of the patient, the doctor, and the nurse in the health system.

**Psychology**

Class and Discussion: 24 hours

The course is designed to give the student a better understanding of the human mind and behavior. The student is introduced to the basic concepts of psychology and is taught how to apply these concepts in practical situations.

**SOCIAL SCIENCES**

Class and Laboratory: 56 hours

This course represents a critical section of content from fields of study such as sociology, anthropology, and political science.

**Chemistry**

Class and Laboratory: 56 hours

The laboratory is well equipped with microscopes, and the student is given practical experience in chemical analysis.

**Microbiology**

Class and Laboratory: 60 hours

The course deals with micro-organisms and their relationships to health and disease.

**ANATOMY AND PHYSIOLOGY**

Neurological and Psychiatric Nursing

Classes, discussions, and clinics, 20 hours.

Emphasis is placed on mental hygiene, psychotherapy, occupational therapy, special types of neurological and psychiatric disorders, special symptomatology, course, treatment, and nursing care of the more severe cases, and the student is given a basic understanding of the etiology.

Advanced Nursing and Pediatrics

Classes and laboratory, 60 hours.

Emphasis here is given to child development, the mental hygiene, treatment, and nursing care of children. The student is exposed to all phases of growth and development.

Pediatric Nursing

The course deals with the child in health and disease from the standpoint of their local well being—physical, mental, emotional.
